## Junior Windows Developer (m/f/i)

Zenguard is a software company for security- and privacy-software. As part of Kape Technologies Plc. we develop under the brands CyberGhost and Zenmate. Our flag ship product CyberGhost VPN is one of the leading VPN services worldwide because we combine the newest in security technology with usability for our customers. Our development team near Aachen is still keeping a certain startup feeling alive and work with the ideal to make the world a bit safer every day.

If you become part of our Windows team you will start designing and implementing the next generation in security and privacy tools for millions of users worldwide.

### What we expect:

- A degree in computer science or a similar training
- A solid foundation of knowledge with C# and the .NET-Framework
- Practical knowledge with WPF ideally in combination with the MVVM pattern
- Fluent in English □ Creativity, engagement and the ability to work in teams

### Nice to have:

- Experience with agile software development (e.g. Scrum, Kanban)
- Experience with rapid prototyping and rapid deployment (as used in Lean Startup)

### What we offer:

- Personal laptop, ultrawide-monitor, newest VisualStudio Licence + Resharper
- Company pension plan
- Air conditioned, large and bright offices just for your team
- Flextime with coretime, homeoffice on demand
- Free membership in fitness studio
- Free parking space
- Free soft drinks, coffee and fruits

We offer you the chance to be part of a friendly, highly motivated, agile team with flat hierarchies where you can make your ideas come true. Help us make the internet a bit safer.
